Title: Vincent Log

Author: Unknown Author

That fool down the hall
doesn't know how to
properly test a magic
door, I have deduced that
the problem is that the
door is waiting for 10
syllables, and yet has to
process normal
conversation at all times
and will quickly break. I
have simply suggested to
make it activate when it
hears a keyword, and
upon activation will be
immediately receptive to
the next eight syllables. I
have sent it down to my
manager for approval, and
plan to go to dinner with
Ulimyk.
